**GISI Introduces In-depth HR Compliance Consulting
without Leaving Your Desk**

People.

BALTIMORE (April 2, 2009) As a regional leader in benefits plan management and consulting, Group Insurance Solutions Inc. (GISI) remains at the market's forefront with the recent launch of an educational and informative webinar series. The series, hosted by GISI's team of expert executives, targets employers who are being impacted by changing legislation, shifting HR practices, and emerging benefits trends. Featured quarterly, the first webinar highlighted Maryland's recently passed Flexible Leave Act.

Methods.

Greg Mayer, GISI's Executive Vice President and Chief Sales Executive, believes "leveraging technology to disseminate critical information to clients is another way GISI provides value and differentiates itself in the benefits broker community. Our clients are impacted by the many moving parts of HR. By monitoring these changes, delivering important information, and guiding them through industry and legislative obstacles, we prove to be an invaluable resource to our clients."

Tools.

People.

Upcoming webinar topics include:

- Payroll, HRIS and Employee Benefits Integration Yields Corporate Savings
- Maryland's New Benefits Legislation for 2009
- HRA/HSA Updates and Looking Ahead

Methods.

Later this year, GISI will introduce a second webinar series specifically focused on the large employer market (employers with 100+ employees). Industry Veteran and GISI's Vice President of Large Market, Mark McWright will head up the tailored sessions. "Our large employers must be nimble when it comes to adapting to legislative and industry changes. The only way to enable that adaptability is to provide the information they need with clear directives so that they can focus on their core competencies while we help execute their HR action plans. Changes to an employer's human resources initiatives affect more than a line or two in their handbooks; they impact our clients' employment practices, benefits, and bottom-line." Dates and times of this series will be announced as available.

Tools.
